**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### Summary

On July 6, 2004, an Office Action was mailed to the Applicant rejecting claims 1-25. On January 6, 2005, the Applicant responded by amending claims 1, 7-12, 14, and 25 and adding new claim 26.

### *Oath/Declaration*

The Examiner acknowledges the attached corrected Oath/Declaration.

### *Claim Rejections - 35 USC § 112*

The rejection set forth in the previous Office Action have been withdrawn.

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-6 and 14-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Coutts (6,311,165) in view of Ott (6,449,253).

Coutts discloses the invention substantially as claimed; however, Coutts does not disclose the controller being operable to upload from the transaction units respective run-time interpreted code units for storing in the memory or separately loading executable code for the respective code modules from the associated transaction unit into the memory means of the controller. Ott teaches method and corresponding system for allocation of ATM switching comprising a controller operable to upload from the transaction units respective run-time interpreted code units for storing in the memory (col.3, lines 39-51) and separately loading executable code for the respective code modules from the associated transaction unit into the memory means of the controller (col.3, lines 39-51). It would have been obvious to one having ordinary skill in the art at the time the invention was made to incorporate the controller being operable to upload from the transaction units respective run-time interpreted code units for storing in the memory and separately loading executable code for the respective code modules from the associated transaction unit into the memory means of the controller, as taught by Ott into the invention disclosed by Coutts, to enable the addition of new units.

Claims 7-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Coutts in view of Korman (6,318,536).

Coutts discloses the invention substantially as claimed; however, Coutts does not disclose enabling validation of currency. Korman discloses a method and corresponding system for a multi-transaction machine comprising enabling validation of currency (col.12, lines 10-25). It would have been obvious to one having ordinary skill

Art Unit: 3624

in the art at the time the system was made to enable currency validation, as taught by Korman into the invention disclosed by Coutts, to prevent fraud.

### ***Response to Arguments***

Applicant's arguments with respect to claims 1-26 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

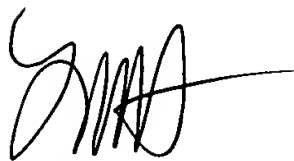

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
